

AADITYA VERMA | RESUME

- » **Status:** Doing B.Tech in Computer Science (AI/ML) at Amity University Noida
- » **Skills:** Python, Artificial Intelligence, SQL, MySQL, Latge Language Models
- » **Interests:** AI Agents, AI Models, RAG, LLM's, Mathematics, Programming
- » **Activities:** Newsletter/Magazine Design, Chess, Swimming, Cricket, Badminton, Table Tennis

Summary

I'm an aspiring Computer Science Engineer with a strong interest in Artificial Intelligence, AI Agents, backend development, and database systems. I enjoy building practical software that solves real-world problems and continuously explore new technologies through hands-on projects and self-directed learning.

I completed my Senior Secondary education at Genesis Global School, Noida, with Physics, Chemistry, Mathematics, and Computer Science. My academic journey strengthened my analytical thinking, mathematical foundation, and problem-solving skills, while also motivating me to explore software development beyond the classroom.

My technical experience includes developing an Asset Management System using Python and MySQL, where I worked on database design, CRUD operations, backend logic, and application development. More recently, I have been expanding my knowledge of AI by learning about Large Language Models (LLMs), AI Agents, prompt engineering, the Claude API, and modern AI development frameworks. My long-term goal is to build intelligent software that combines automation with practical problem-solving.

Beyond academics, I have actively taken on leadership and creative responsibilities. I served as the Designer of Silicon Stories, my school's Computer Science magazine, and previously contributed as Editor of the Polyglot language magazine and Designer of the Expressions junior school magazine. These experiences strengthened my communication, teamwork, creativity, and attention to detail.

I was recognized as a Top Intern and one of the Top 10 Outstanding Interns during the Linkube Young Leaders Summit (LYLS), where I participated in leadership development, strategic thinking, and collaborative projects. I also completed a Finance Management Internship, gaining exposure to budgeting and organizational decision-making.

I have represented my school in technology competitions, Model United Nations, chess tournaments, Olympiads, and various inter-school events. Among my academic achievements, I secured an All India Rank of 1025 in the Ramanujan National Maths Challenge conducted by the All India Council for Technical Skill Development.

As I begin my undergraduate journey in Computer Science, I am focused on strengthening my expertise in Artificial Intelligence, Machine Learning, software engineering, and scalable systems. I am always excited to collaborate on meaningful projects, participate in hackathons, and connect with people who share a passion for technology and innovation.

Experience

Apr '24 - Apr '26 **Magazine Designer**

Genesis Global School

- » Designer in Silicon Stories, School Computer Science Magazine
- » Designed the visual layout and graphics for Silicon Stories, the school's Computer Science magazine
- » Collaborated with faculty members and student contributors to create engaging, well-structured technical content for publication
- » Applied design principles, attention to detail, and creative problem-solving to present computer science topics in a visually appealing and accessible manner
- » Coordinated with the editorial team to ensure consistency in formatting, branding, and publication quality while meeting project deadlines

Dec '24 - Jan '25 **Intern**

GeniusHub

- » GeniusHub Finance Management Internship
- » Completed a Finance Management Internship focused on budgeting, financial planning, and resource allocation
- » Gained practical exposure to financial management concepts and business decision-making
- » Worked on structured assignments while collaborating with mentors during the internship

» Developed organizational, analytical, and professional communication skills

Oct '24 - Dec '24 **Top Intern**

Lynkube

- » Lynkube Young Leaders Summit 2024-25
- » Selected as a Top Intern during the Lynkube Young Leaders Summit (LYLS)
- » Recognized among the Top 10 Outstanding Interns for consistent performance and active participation
- » Participated in leadership development programs focused on strategic thinking, teamwork, and professional communication
- » Collaborated with peers on problem-solving and project-based activities in a structured learning environment
- » Strengthened leadership, critical thinking, and collaboration skills through practical assignments

»»» Projects

Nov '25 - Jan '26 **Asset Management System**

Genesis Global School

» Designed and developed an Asset Management System using Python and MySQL to efficiently manage and track school assets through a relational database.

Key features include:

- Secure user authentication
- Asset inventory management
- CRUD (Create, Read, Update, Delete) operations
- Relational database design using MySQL
- Efficient data retrieval and record management

This project strengthened my understanding of Python programming, SQL, database management, backend development, and software engineering principles by solving a practical real-world problem.

»»» Education

2012 - 2026 **High School Degree, PCM with CS**

Genesis Global School

» Grade: 81.25%
